

the famous PAASCHE AB airbrush

PAASCHE V series airbrushes

PAASCHE AB Fine Arts Airbrush

(Illustrated on the cover. Actual length is 5½")

The world's finest and most accurately controlled airbrush, the Paasche AB, is the choice of the nation's leading illustrators.

This precision instrument makes possible the sharpness of detail necessary in the highest quality commercial art, photo retouching, architectural and monumental designing.

Powered with an air turbine, the AB Airbrush is controlled at any speed up to 20,000 RPM. The turbine reciprocates a finely pointed hardened steel needle which carries color to the air stream where it is atomized. Color cup can be adjusted for easel or drawing board use. The ball of the color cup can rest as a guide on the drawing for greater accuracy of very fine detail work.

The AB Airbrush is furnished complete with one dozen needles, a screw driver, tweezers, wrench, hanger, hose coupling and instructions, all packaged in an attractive velvet-lined, leather-covered case. Left-handed operators order ABL.

PAASCHE V Series Airbrushes

(Illustrated on inside front cover. Actual length is 5½")

The Paasche V Airbrush is second only to the Paasche AB for fineness of detail. A precision instrument, it is used for illustration, photo retouching and portrait painting. It is the most popular airbrush for vignetting, laying backgrounds and tinting. More and more artists are discovering that they can increase their layout and finished art quality and profits by using a Paasche V Airbrush. In Industry, the Paasche V Airbrush is used extensively for decorative finishing.

Two sizes of multipleheads and needles with self-centering replaceable tips give wider work-

ing range as they can be quickly and easily changed. Size 1 is for finer detailed work than size 2. Rapid color changes are made easy by detachable color cups. The Paasche V Airbrush has a double-action finger lever which controls the air and amount of color desired. The micrometer line adjuster provides quick setting from the finest line to a wide pattern.

Paasche V size 1 or 2 is furnished complete with extra needle, extra self-centering tip, reamer, $\frac{1}{8}$ oz. color cup, hanger, wrench, hose coupling and instructions, packed in an attractive case. Size 1 multiplehead and needle will be furnished unless otherwise specified. Order alternate multiplehead and matching needle, size 1 or 2, separately. See price list for extra parts, color cups and bottles.

Paasche V Jr. Airbrush is basically the same as the V Airbrush, except that instead of a detachable color cup, it has a built-in color well. It is used where there are frequent changes of color and only a small amount of each color is required. Uses the same multipleheads as V above.

PAASCHE VL Series Airbrushes

(Illustrated on inside back cover. Actual length is 6 $\frac{1}{4}$ ")

The Paasche VL Airbrush is used by America's leading poster artists and displaymen. Double action finger control permits instant regulation of color and air without stopping work. Because it is instantly adjustable, it is used extensively with reduced lacquers, varnishes, paints and ceramic glaze in finishing and decorating china, ceramics and plastics. Industry uses the Paasche VL Airbrush for finishing miniaturized and small components. It is excellent for touch-up work, decorating and stenciling in all types of product finishing.

Three sizes of multipleheads, tips and needles are available for the VL Airbrush. Size 1 is for detail work, size 2 is for medium line or spray and size 3 is for heavier line and wider spray. Order matching multipleheads, tips and needles.

PAASCHE H Series Airbrushes

(Illustrated on the back cover. Actual length is 6¼")

Paasche H Airbrushes are the most popular for ceramics, cake decorating, sign painting, window decorating, novelty and jewelry manufacturing, industrial touch-up and decorating and toy manufacturing. They are of simple design and easy operation. The wide range of color effects makes it possible for the operator to paint, stencil or decorate in solid, stipple or granular colors with a minimum of practice.

The air and color feeds are independent and are adjustable to give a fixed line, shade or stipple effect.

Three sizes of interchangeable color adjusting and air cap parts give wide range from a line to a wide spray. Size 1 is for light consistency colors and fine detail; size 3 is for medium consistency colors less detail; size 5 is for heavier consistency colors and wider spray. Any liquid color, paint, varnish or lacquer reduced to free flowing consistencies can be used.

Paasche H size 1, 3 or 5 airbrush comes complete with ¼ oz. color cup, 3 oz. color bottle, hanger, hose coupling, instructions for care and handling and is packed in an attractive case. Furnished with size 3 color adjusting and air cap parts unless otherwise specified. See price list for extra parts, color cups and bottles.

Paasche F Airbrushes are of the same design as type H Airbrushes except that they are smaller. They require lighter consistency colors

and operate at one-third the speed of the larger airbrushes. Ideal for beginners as they are easy to master, simple to operate, damage-proof and have few mechanical parts that require attention. Available with size 1 air cap and color adjustment for medium detail and spray or size 2 for covering broader areas and less detail. Ordering both sizes of air caps and color adjusting parts gives this airbrush a wide range of effects and area coverage. See price list for extra parts, color cups and bottles.

Paasche A 1/8" Braided Air Hose with Couplings is specifically designed for long, trouble-free use with airbrushes and sprayers. Available in 6, 8 or 10 foot lengths.

Paasche Airbrush Colors are scientifically manufactured for airbrush use to insure smoothness of application, brilliancy, permanency and unsurpassed texture. Protect your airbrush investment with colors which will not settle, are soluble, finely ground and specifically prepared for airbrush use.

Liquid alcohol colors, liquid lacquer based weatherproof colors and liquid water colors are available in red, yellow, blue, orange, purple, pink, green, brown and black. The same colors, except for orange, are available in powder form plus reproduction white. Tempera colors come in dark red, red, red orange, yellow red, rose, primrose, yellow, yellow orange, orange, blue, violet, magenta, turquoise blue, green, brown, black, grey, white, gold and silver. Ever-moist water colors are available in orange, crimson lake, vermilion, lemon yellow, sepia, sky blue, Hooker green 1 and 11, ultramarine, burnt sienna, lamp black and white.

Paasche Stencil Swivel Knife cuts any material from light silk screen to heavy metal foil. Blade

locks for straight line work or releases for swivel use in cutting perfect curves. Cutting point is angled to allow full view of work.

Paasche DBS Sprayer is the answer to artists' requests for a fast and efficient fixative sprayer. Hobbyists, novelty manufacturers, ceramists and many others have found this sprayer handles medium consistency materials effectively.

Paasche LCG Adapter Kit is for use on liquid carbonic gas tanks (obtained from soda fountain supply houses) to convert them for use with an airbrush. Kit includes air regulator, pressure gauge, valve, tank clamp, universal wrench and an eight foot length of plastic air hose with proper couplings.

Paasche LCT Liquid Carbonic Tank Unit is designed for airbrush use. Ideal for artists whose use of compressed air does not warrant an air compressor or a large commercial rental cylinder. Tank may be recharged at any soda fountain supply house or carbonic gas distributors listed in the classified telephone directory. Unit is complete with air regulator, pressure gauge, valve, 6 foot hose and couplings, carbonic cylinder and tip-proof base.

Paasche Studio Air Compressors

The Paasche D 1/4 H.P. air compressor is a diaphragm type, quiet in operation, economical in cost and is practically maintenance free. Delivers up to 30 lbs. pressure. 110 V, 60 Cy., S.P. motor for AC operation.

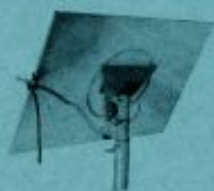

The PBO 1/4 H.P. oil-less compressor is maintenance free and of attractive appearance. Delivers up to 40 lbs. pressure. 115 V, 60 Cy., 1 Ph. motor for AC use. Motor and compressor are designed in one compact fan cooled unit.

The Paasche PAE 1/4 H.P. Compressor is equipped with an automatic start and stop switch with bleeder. Motor operates only as air pressure from air-receiver base is used up. Can supply air for up to five airbrushes. 110 V, 60 Cy., 1 Ph. motor for AC use. Includes air regulator, safety pop-off valve and two 1/4" air outlet valves. Order belt guard separately.

Paasche Convertible Easel- Drawing Board

This drawing board is the finest available for professional airbrush work. Its special friction tight, 360 degrees revolving mechanism permits work to be swung into any position. The board

can be quickly tilted at any angle from horizontal to vertical position. Height can be securely locked with an eccentric lever for fast height adjustment from 32" to 50" (with board in horizontal position).
